Summary

An aspiring programmer with a strong foundation in C# and Unity looking to enter the software industry. Experienced working in a small independent team developing a project from concept to release, successfully launching a game on the Steam platform for Windows. Looking to apply and improve technical skills in a professional software development environment.

Education

Metropolitan State University

- Bachelor of Science in Computer Science

St. Paul, MN

Graduated May 2022

Technical Skills

- **Programming Languages**
 - Proficient: C#
 - Familiar: Python, Java, Javascript, HTML, CSS
- **Technologies:** Unity, .NET/.NET Core, Visual Studio, Django, Postgresql, Linux, SSH, WinForms, Web API, REST API, SQL Server, Git, GitHub, JSON

Projects

- **Portfolio Website - Python, Django, Javascript, Postgresql** **September 5, 2024**
 - Developed and deployed a portfolio website using Python and Django, with a PostgreSQL database, self-hosted on a local machine running Ubuntu Server.
- **Ecommerce Website - Python, Django, Javascript, Postgresql** **September 23, 2024**
 - Developed and deployed a mock ecommerce website using Django and PostgreSQL. Self-hosted using a local machine running Ubuntu Server.
- **Space Cheese Defenders - Unity, C#** **Released February 22, 2024**
 - Developed and released a tower defense/real time strategy (RTS) game on Steam.
 - Led gameplay programming, including player ship controls, enemy AI, spawning mechanics, UI, and basic Steam integration.
- **Ghost & Goblin - Unity, C#** **August 7, 2024**
 - Collaborated as part of a two-person team to develop a game within 2 weeks for the Pirate Software Game Jam.
 - Focused on implementing puzzle interactions between the player and goblin character.
- **Untitled Forest Game - Unity, C#** **April 10th, 2023**
 - Developed a game in 48 hours as a team of 2 for the Ryan Laley Games Spring Jam
 - Created player controls and environmental hazard interactions as the main programmer.
- **Unity Game Mechanics Test Project - Unity, C#** **October 2023**
 - Recreated various game mechanics/systems, including inventory, item management, stats, status effects, UI interactions, saving/loading data and more with a focus on systems/tools that support a plug and play workflow in Unity's editor.
